#### **Environmental Protection Agency**

these records for inspection and copying upon request by an employee of EPA or any entity designated by EPA, such as a State, another political subdivision or a Tribe.

- (1) For each pesticide product distributed or sold in refillable containers, all of the following records must be maintained for the current operating year and for 3 years after that:
- (i) The written contract from the pesticide product's registrant for the pesticide product.
- (ii) The written refilling residue removal procedure for the pesticide product.
- (iii) The written description of acceptable containers for the pesticide product.
- (2) Each time you repackage a pesticide product into a refillable container and distribute or sell the product, the following records must be generated and maintained for at least 3 years after the date of repackaging:
- (i) The EPA registration number of the pesticide product distributed or sold in the refillable container.
  - (ii) The date of the repackaging.
- (iii) The serial number of the refillable container.

### §§ 165.71-165.79 [Reserved]

### Subpart E—Standards for Pesticide Containment Structures

### § 165.80 General provisions.

- (a) What is the purpose of the regulations in this subpart? The purpose of the containment regulations in this subpart is to protect human health and the environment from exposure to agricultural pesticides which may spill or leak from stationary pesticide containers. This protection is achieved by the construction of secondary containment units or pads at certain facilities handling agricultural pesticides. These regulations will also reduce waste generation associated with:
- (1) Storage and handling of large quantities of pesticide products.
- (2) Pesticide dispensing and container-refilling operations.
- (b) Do I have to comply with the regulations in this subpart? You must comply with the regulations in this subpart if you are an owner or operator of one of

the following businesses and if you also have a stationary pesticide container or a pesticide dispensing (including container refilling) area:

- (1) Refilling establishments who repackage agricultural pesticides and whose principal business is retail sale (i.e., more that 50% of total annual revenue comes from retail operations).
- (2) Custom blenders of agricultural pesticides.
- (3) Businesses which apply an agricultural pesticide for compensation (other than trading of personal services between agricultural producers).
- (c) When do I have to comply? You must comply with all applicable containment regulations for new and existing structures as of August 17, 2009.

## § 165.81 Scope of stationary pesticide containers included.

- (a) What is a stationary pesticide container? A stationary pesticide container is a refillable container that is fixed at a single facility or establishment, or, if not fixed, remains at the facility or establishment for at least 30 consecutive days, and that holds pesticide during the entire time.
- (b) What stationary pesticide containers are subject to the regulations in this subpart? Stationary pesticide containers designed to hold undivided quantities of agricultural pesticides equal to or greater than 500 gallons (1,890 liters) of liquid pesticide or equal to or greater than 4,000 pounds (1,818 kilograms) of dry pesticide are subject to the regulations in this subpart and must have a secondary containment unit that complies with the provisions of this subpart unless any of the following conditions exists:
- (1) The container is empty, that is, all pesticide that can be removed by methods such as draining, pumping or aspirating has been removed (whether or not the container has been rinsed or washed).
- (2) The container holds only pesticide rinsates or wash waters, and is labeled accordingly.
- (3) The container holds only pesticides which would be gaseous when released at atmospheric temperature and pressure.

#### § 165.82

(4) The container is dedicated to non-pesticide use, and is labeled accordingly.

# § 165.82 Scope of pesticide dispensing areas included.

- (a) What pesticide dispensing areas are subject to the regulations in this subpart? A pesticide dispensing area is subject to the containment regulations in this subpart and must have a containment pad that complies with the requirements of this subpart if any of the following activities occur:
- (1) Refillable containers of agricultural pesticide are emptied, cleaned or rinsed.
- (2) Agricultural pesticides are dispensed from a stationary pesticide container designed to hold undivided quantities of agricultural pesticides equal to or greater than 500 gallons (1,890 liters) of liquid pesticide or equal to or greater than 4,000 pounds (1,818 kilograms) of dry pesticide for any purpose, including refilling or emptying for cleaning. This applies when pesticide is dispensed from the container into any vessel, including, but not limited to:
  - (i) Refillable containers;
  - (ii) Service containers;
  - (iii) Transport vehicles;
  - (iv) Application equipment.
- (3) Agricultural pesticides are dispensed from a transport vehicle for purposes of filling a refillable container.
- (4) Agricultural pesticides are dispensed from any other container for the purpose of refilling a refillable container for sale or distribution. Containment requirements do not apply if the agricultural pesticide is dispensed from such a container for use, application or purposes other than refilling for sale or distribution.
- (b) What pesticide dispensing areas are exempt from the regulations in this subpart? A pesticide dispensing area is exempt from the regulations in this subpart if any of the following conditions exist:
- (1) The only pesticides in the dispensing area would be gaseous when released at atmospheric temperature and pressure.
- (2) The only pesticide containers refilled or emptied within the dispensing area are stationary pesticide con-

tainers which are already protected by a secondary containment unit that complies with the provisions of this subpart.

(3) The pesticide dispensing area is used solely for dispensing pesticide from a rail car which does not remain at a facility long enough to meet the definition of a stationary pesticide container; that is, 30 days.

## § 165.83 Definition of new and existing structures.

- (a) What is a new containment structure? A new containment structure is one whose installation began after November 16, 2006. Installation is considered to have begun if:
- (1) You, as the owner or operator, have obtained all Federal, State, and local approvals or permits necessary to begin physical construction of the containment structure; AND
- (2) You have either begun a continuous on-site physical construction or installation program OR you have entered into contractual obligations. The contract must be such that it cannot be canceled or modified without substantial loss, and must be for the physical construction or installation of the containment structure within a specific and reasonable time frame.
- (b) What is an existing containment structure? An existing containment structure is defined as one whose installation began on or before November 16, 2006.

# § 165.85 Design and capacity requirements for new structures.

- (a) For all new containment structures, what construction materials must I use? These are the material specifications for a new containment structure:
- (1) The containment structure must be constructed of steel, reinforced concrete or other rigid material capable of withstanding the full hydrostatic head, load and impact of any pesticides, precipitation, other substances, equipment and appurtenances placed within the structure. The structure must be liquid-tight with cracks, seams and joints appropriately sealed.
- (2) The structure must not be constructed of natural earthen material, unfired clay, or asphalt.
